## Summary

Driven and focused junior developer seeking a position in a friendly environment that provides opportunities for interesting challenges, personal growth, and creativity.

## Experience

### **Underwriters Laboratories**

**Northbrook, IL**

*Ruby on Rails Developer*

April 2015 – February 2016

- < Balances the development of new projects in the Ruby on Rails stack while maintaining, supporting, or repurposing legacy applications in stacks such as Oracle, ColdFusion, and Php.
- < Acts in a leadership and often changing role to supplement the needs of the team.

### **Model United Nations Development Organization**

**Chicago, IL**

*Executive Director of Operations*

Spring 2015

- < Responsible for all logistical and technical matters pertaining to a 1,250 person conference held each December in Chicago.

*Director of Technology*

- < Develops application and software packages for use by conference administrators and general staff.
- < Maintains and updates the conference website and client database.

### **Knox College IT Helpdesk**

**Galesburg, IL**

*Helpdesk Associate*

2012-2014

- < Worked directly with clients in diagnosing and solving computer and technical based problems.
- < Set up and performed maintenance on computers throughout the campus.

## Education

### **DevBootcamp**

**2014-2015**

A 19-week highly intensive software developer training program located in Chicago, with an emphasis of pair programming, test-driven development, and engineering empathy.

### **Knox College**

**2012-2014**

Studied Computer Science.

## Projects

### **CIMUN SkyNet System**

- < Created over the course of six months as a central administration system for the Chicago International Model UN Conference.
- < Connects with several different custom Rails applications to handle client data, staff information, and event operations through a Rails API.
